QUESTION NO. 1: ESSAY - ARTIFICIAL INTELLIGENCE: THREAT OR BOON TO EMPLOYMENT?

Artificial Intelligence: A Threat or Boon to Employment?

The rapid progress of Artificial Intelligence has sparked global debate on whether AI represents a threat to human jobs or a boon to employment opportunities. Skeptics argue that automation in industries like manufacturing, customer service, and data processing will lead to job displacement.

Conversely, proponents highlight that AI creates brand-new career sectors in software development, data analytics, AI ethics, and robotics maintenance. Furthermore, AI tools boost productivity, allowing human workers to focus on creative problem-solving and strategy.

In conclusion, while AI changes workplace dynamics, human adaptability and continuous upskilling will ensure AI serves as a powerful partner rather than a replacement.

QUESTION NO. 8: EXPOSITORY PARAGRAPH - OUR TRAFFIC PROBLEMS**Our Traffic Problems**

Traffic congestion has become a severe daily challenge in major urban cities across Pakistan. The exponential growth of private vehicles, unauthorized roadside parking, and reckless driving behavior contribute heavily to daily traffic bottlenecks. Consequently, citizens waste valuable productive hours, consume excess fuel, and experience heightened stress levels. To resolve traffic congestion, municipal authorities must expand public bus systems, strictly enforce traffic regulations, and repair signal infrastructure.
